EXPERIENCE

Prospus and Kaamfu — Senior Frontend Developer

October 2022 - April 2026

Technologies:

VueJS, Vue3, PHP, Github, JS, CSS, CSS3, SASS, SCSS, SSR and Axios

httpmédia — Frontend Developer

September 2015 - 2023

Technologies:

VueJS, NuxtJS, PHP, ExpressionEngine, Github, JS, CSS, CSS3, SASS, SCSS, SSR and Axios

Freelance — Frontend Developer

September 2014 - 2015

Technologies:

PHP, Wordpress, JS, CSS, CSS3, SASS, SCSS, Ajax and Axios

SKILLS

- VueJS,
- Vue3
- NuxtJS
- Vuetify
- Wordpress
- Bootstrap
- CSS
- Sass
- Javascript
- Axios
- Ajax
- SQL
- PHP

EDUCATION

STI, Davao PH — Bachelor of Science in Information Technology

June 2010 - April 2014

PROJECTS

Kaamfu (Product of Prospus) — Senior Frontend Developer

October 2022 - April 2026

Developed a Trello-like project management platform composed of three integrated applications designed to streamline team collaboration, task tracking, and productivity monitoring:

1. Kaamfu Web Application (API & Web App):
 - Task and team management system
 - Real-time communication via Twilio Conversations
 - Interactive dashboard with task analytics and graphs
2. WordPress Plugin:
 - Embedded chat and project management features for seamless integration into WordPress sites

3. Desktop Time Tracking Application:

- Monitors and records contractor (developers/designers) work hours to improve accountability and reporting

Responsibilities:

1. Designed and developed core modules and features based on business and technical requirements.
2. Led and mentored team members by reviewing code, providing technical guidance, and ensuring task alignment.
3. Conducted code reviews to maintain code quality, consistency, and best practices.
4. Diagnosed, debugged, and resolved complex technical issues across multiple applications.

Technologies:

Vue3, Vuetify, Github, JS, CSS, CSS3, SASS, SCSS, Axios and Wordpress

Guided Hearing Experience (Product of Prospus) — Senior Frontend Developer

October 2022 - 2025

Developed a WordPress plugin for an online hearing assessment platform that enables users to complete an initial evaluation through a combination of survey questions and sound frequency tests. Based on user inputs, the system generates preliminary results, automatically sends them via email, and allows users to seamlessly book follow-up appointments.

Responsibilities:

1. Designed and developed plugin modules and features in line with functional requirements and UI/UX specifications.
2. Troubleshooting, debugging, and resolving complex technical issues to ensure accuracy and reliability of test results.
3. Implemented responsive design to provide a seamless experience across mobile and desktop devices.

Technologies:

Vue3, Vuetify, Github, JS, CSS, CSS3, SASS, SCSS, Axios and Wordpress

Store Front Office (Product of httpmédia)— Frontend Developer

Late 2020 - May 2023

Developed a custom Content Management System (CMS) similar to WordPress, enabling administrators to easily create, edit, and manage website content through an intuitive dashboard. The platform includes a flexible theming system that allows users to customize visual elements such as backgrounds, colors (fonts, borders, and layouts), and typography to match branding requirements.

Responsibilities:

1. Designed and developed core modules and features based on functional requirements and UI/UX specifications.
2. Led and mentored a team member by reviewing code, providing technical guidance, and supporting task completion.
3. Diagnosed, debugged, and resolved complex technical issues to ensure system stability.
4. Implemented responsive design to ensure optimal performance across mobile and desktop devices.

Technologies:

NuxtJs, Github, JS, CSS, CSS3, SASS, SCSS, SSR and Axios

Interactive Activities (Product of httpmédia) — Frontend Developer

April 2018- 2023

Developed an interactive e-learning platform designed to make learning Math and vowel recognition engaging and enjoyable for students. The system incorporates dynamic UI animations (e.g., flip, slide, fade in/out) using CSS and JavaScript to enhance user interaction and maintain student interest.

Multiple Choice: Audio-based activity where students listen to a vowel sound and select the correct answer from four interactive cards.

Memory Matching: Card-pairing game that challenges students to match vowels with corresponding words using a two-column card layout.

Responsibilities:

1. Developed and implemented modules and features based on design specifications and functional requirements.
2. Troubleshooting, debugging, and resolving complex technical issues.
3. Ensured responsive design and optimized table layouts across various screen sizes.

Technologies:

VueJS, Github, JS, CSS, CSS3, SASS, SCSS and Axios

Medicine Guide (Product of httpmédia) — Frontend Developer

August 2018- Early 2019

Developed an offline-capable web application serving as a comprehensive medicine library for medical students. The platform enables users to access detailed information—including descriptions, compositions, formulas, and uses of various medicines—without requiring an internet connection, ensuring reliability and accessibility anytime.

Responsibilities:

1. Designed and developed application modules and features based on functional requirements and UI/UX specifications.

2. Diagnosed, debugged, and resolved complex technical issues to maintain system stability and performance.
3. Implemented responsive layouts, ensuring seamless usability across desktop and mobile devices.

Technologies:

VueJS, Github, JS, CSS, CSS3, SASS, SCSS and Axios
